

IMER STEP 120

Standard Equipment

- Electric supply panel with standard pneumatic remote control and arranged for electric remote control
- Motor (2,2 KW for single-phase version) (3,6/4,8 KW for three-phase double speed version)
- Rotor and Screw for traditional mortar (IM 25L)
- Spraying gun for traditional/premixed mortar
- Vibrating grid
- Compressor (250 l/min for single-phase version) (310 l/min for threephase version)
- 30 m (20+10) of hose Ø 35 for material with cam couplings
- 31 m of air hose Ø 13 with quick couplings
- Box of accessories for traditional mortar spraying

Optional Accessories

- Planetary mixer (motor 1,1 KW - 400V / 1,4 KW - 230V), capacity 120 l, output per batch 90 l, loading height 1230 mm, provided with reversing mixing paddle system.
- Grid for premixed materials
- Electric remote control with 33 m cable.
- Rotor and Screw for premixed plasters (2L6).
- Rotor and Screw for self-levelling screed (60.12).
- Injection kit (spraying gun + pressure gauge+ pressure switch)
- Tow bar at adjustable height + lighting equipment for towing on the road
(only in countries where it is allowed)
